## what do you want to make today?

Become a member today at New York City's largest makerspace and have access to advanced manufacturing, digital technologies, and industrial fabrication tools and equipment to make your ideas happen! Membership at either space is cross-honored.

**memberships • classes • events • and more**

***Now at 2 Locations!***

### **futureworks makerspace**

15,000 sq ft state-of-the-art indoor fabrication facility with emphasis on advanced manufacturing equipment

5,000 sq ft storage facility with rentable lockers and walk in storage units

welding • metal fabrication • Waterjet cutter • CNC milling • machining • powder coating oven • spray booth • sandblasting cabinet • plasma cutting • woodworking • cnc routers • industrial sewing machines • cnc embroidery • silkscreen • large format photo printer • laser cutters • 3D printing • electronics • plastic vacuum former • maker-in-residence programs • skill building classes • K-12 STEAM programs • family programs

### **staten island**

### **staten island makerspace**

welding • metal fabrication • blacksmithing • CNC milling • machining • plasma cutting • woodworking • cnc router • ceramics • sewing • laser cutters • vinyl cutters • 3D printing • maker-in-residence programs • skill building classes • public art programs • beekeeping & sustainability programs • K-12 STEAM programs • family programs

6,000 sq ft indoor industrial fabrication facility with 35 ft ceilings and overhead cranes for large scale work

27,000 sq ft outdoor space for public art, events, and workshops

Semi-private studio space rentals

**MakerSpace NYC** was founded in 2013 after the studio and metal shop once privately used by our founders, DB Lampman & Scott Van Campen was flooded by Hurricane Sandy. Sandy hit in October 2012 and over the next year, thanks to funding from the NYCEDC and the many volunteers who gave their time, advice, skills and hard work, we opened Staten Island MakerSpace on October 28, 2013.

Since 2013, the organization has grown to become a cultural anchor in the borough, and helped thousands of creative entrepreneurs get their start. In addition to a vibrant makerspace, our staff and a team of volunteers have created a sculpture park in Staten Island that provides artists with the opportunity to create large scale public art. Our education department has flourished and we are proud to have provided STEM and arts education to tens of thousands of students all across the city. **In the 2018-19 school year we taught over 18,000 K-12 students in New York City schools.**

In early 2019 we partnered with the New York City Economic Development Corporation to open the Futureworks MakerSpace at the Brooklyn Army Terminal. In lieu of this expansion, the organization re-branded to MakerSpace NYC. The new space has the same community focused approach but, also is being used to encourage entrepreneurship, advanced manufacturing and product development. Our memberships at both locations are cross honored, so you can take a blacksmithing class in Staten Island in our outdoor sculpture park, and go to Brooklyn to use the water-jet cutter or the industrial sewing machines.

**The expansion into Brooklyn makes us New York City's Largest and best equipped makerspace**

## **The possibilities of making are endless and at your fingertips**

Check out this video from the TBS television show, **America's Greatest Makers** to get an overview of who we are and what we do:
