City Parks: America's New Infrastructure - Traffic & Transportation [5:38]

Nov 15, 2017

CT.org...Here is another excellent video in City Parks' series "City Parks: America's New Infrastructure". The collaboration of the parks and mobility systems of a city, small and large, offers synergies that benefit residents, businesses and visitors. The examples in the video are easily adaptable to many smaller municipal venues.

"City Parks Alliance releases the latest video in the five-part series, "City Parks: America's New Infrastructure," focused on the role of linear parks in providing transportation options to city residents. Featuring Fairmount Park System in Philadelphia, PA, The 606 in Chicago, IL, and The Lafitte Greenway in New Orleans, LA, this video shares information on how the parks are providing commuter access to jobs and retail, as well as recreational walking and cycling needs."
